Mural Instructions

1. Select panel number 1.

2. Lay panel face down on a flat surface. Apply the wallpaper paste evenly to the back of the panel, allow the paste to soak for 1-2 minutes, do not lay the pasted sheets on top of each other and do not fold the pasted panel. It is very important to take extra care to make sure paste is applied to the edges. Try not to get paste on the printed side, apply the panel on to the wall using a soft cloth. Work from top to bottom and from left to right taking extra care not to overwork each panel. If one of the panels gets too wet or overworked by repositioning, it will stretch and make lining up the pattern most difficult.

3. Carefully remove excess paste from the front of the mural using a soft cloth. Too much rubbing or cleaning will remove the ink from the paper.

4. Repeat steps for remaining panels, following the printed guidelines on each panel overlap all joining edges by approximately 6mm, this prevents the seams from showing after they dry. It is common for each panel of a wet mural to be 1.25cm larger than a dry panel of the mural as each panel expands once paste is applied.

5. Trim the excess edges carefully after the paper has dried.

INSTALLING THE PANELS:

Follow the manufacturer's instructions on the order of panel installation. Do not wait too long between installation of each panel or the panel designs will not line up correctly. Be prepared to proceed with each panel until the job is done before taking a break.

Since the placement of the first panel determines the overall look of the finished mural, take extra time and care to place it accurately. To mark the position of the first panel, draw vertical lines on the wall using a pencil, a level and a plumb line.
